

1. Having K-LOVE available to me in the Oklahoma City area is a great service that provides a positive message throughout my day that helps me unwind from the days stressful times we live in. They also provide local information about upcoming events that I am interested in hearing.

2. I truly believe that without having K-LOVE available to the local OKC community would be detrimental in that there are so few stations that provide such a positive message.

3. I believe that the service K-LOVE provides is in the public interest because it is a positive message, one free from the regular commercialism you can find on any of the other 90 or so public stations available. K-LOVE is a very encouraging station and I would be highly disappointed if it were not available just so some other stations were given preferential treatment because it may be one the new, cool ways to use the airwaves. What public interest do these LPFM stations provide that over-ride the positive, encouraging feelings that you get listening to K-LOVE?

Sincerely, Anthony Fournier
